

# Ripfactory

## Ripstation AudioEntry

*Pre Process Metadata Entry*

### Overview

Ripstation AudioEntry is a standalone utility for use in conjunction with Ripfactory's Ripstation family of products to allow user import and entry of metadata.

Ripfactory recognises that CDN and encoding houses have a clear need for reliable and fast metadata entry for retrieval at point of encode and AudioEntry has been designed to match all of these needs

### Key Features

- Standalone Data entry module
- Bar Code scanner for UPC entry
- Manual User entry for all details – Track, Artist, album, internal UPC, Label, Copyright
- Checksum calculation for unique identification
- Auto import of data from XML, CSV or XLS data sources
- Optional FreeDB/on line data population
- Box set correlation

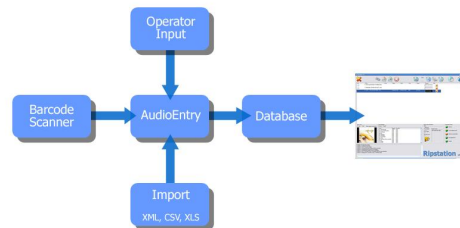

### Platform

- Windows XP SP2
- Window Vista
- .NET Framework 2.0

### Deployment Scenarios

- Content Aggregators
- CDN
- Music Stores
- Encode Houses

### Workflow

### License

Ripstation AudioEntry is licensed on a per seat or site license as a cost effective module addition to Ripstation 4.2 and is available for immediate download.

### Pricing
