

Ripfactory

ripstation lite pro xd automated cd conversion

Building on the foundation of Ripfactory's Ripstation range of automated solutions brings Ripstation Lite - a cost effective yet fully automated solution for lower volume CD conversion.

Utilising Ripstation's conversion accuracy and workflow management tools brings together a powerful solution to the service provider and retailer to achieve consistent fully automated throughput of 25 CD's per hour.

Ripstation Lite runs on a single PC and utilises robotic technology to provide unattended CD conversion - its as simple as three clicks and the process is started.

And Ripstation Lite doesn't scrimp on features either - our proven philosophy of Metadata accuracy still holds and by using the GD3 database ensures accurate and detailed metadata including full cover art capability.

Ripstation Lite supports:

- Loading of 80 CD's at each load
- Support for WAV, MP3, FLAC, AAC and WMA
- Integrated support for the GD3 database with optional secondary data sources
- Simple Batch workflow
- Error checking
- Full integration with all other Ripstation modules
- Bundled software for DVD backup
- Automated iPod loading

Ripstation Lite is available as a bundle option with all software and robotic hardware , simply requiring a single PC and you are ready to go.

System Requirements

- Windows XP with SP2
- Pentium 4 - 3.0 GHz or equivalent
- 1GB RAM, 250 GB Hard drive
- USB2.0 Port
