

Ripfactory

ripstation lite pro automated cd conversion

Building on the foundation of Ripfactory's Ripstation range of automated solutions brings Ripstation Lite - a cost effective yet fully automated solution for lower volume CD conversion.

Utilising Ripstation's conversion accuracy and workflow management tools brings together a powerful solution to the service provider and retailer to achieve consistent fully automated throughput of 25 CD's per hour.

Ripstation Lite runs on a single PC and utilises robotic technology to provide unattended CD conversion - its as simple as three clicks and the process is started.

And Ripstation Lite doesn't scrimp on features either - our proven philosophy of Metadata accuracy still holds and by using the GD3 database ensures accurate and detailed metadata including full cover art capability.

Ripstation Lite supports:

- Loading of 25 CD's at each load
- Support for WAV, MP3, FLAC, AAC and WMA
- Integrated support for the GD3 database with optional secondary data sources
- Simple Batch workflow
- Error checking
- Full integration with all other Ripstation modules
- Bundled software for DVD backup
- Automated iPod loading

Ripstation Lite is available as a bundle option with all software and robotic hardware, simply requiring a single PC and you are ready to go.

System Requirements

- Windows XP with SP2
- Pentium 4 - 3.0 GHz or equivalent
- 1GB RAM, 250 GB Hard drive
- USB2.0 Port
- Internet connection for automatic updates

Ripstation Lite Specifications

General	Operating System:	Windows XP Pro with .NET 2.0
	Weight and Dimensions:	Shipping weight - 4 KG's , Desk footprint : 330mm (D) x 220mm (W)
	Hardware Requirements:	P4 2.8GHz or equivalent. 1GB RAM/250GB HD , Internet Access
	Overview:	25 CD's per hour, fully automated CD conversion and loading solution: <ul style="list-style-type: none">- Robotically Loaded with bundled hardware- Support for all major compressed file formats- Integrated batch management- Automatic output to DVD, HD or connected hard drives
	Options:	<ul style="list-style-type: none">- AudioLoader - loading of files to XiVA platforms- AudioFile - client catalog generation
	Warranty and Updates:	1 year RTB and telephone warranty, Automated updates via web connection
Inputs	Media:	Audio CD to Red Book Standard
	Platform:	MT1 Automated Robot, IDE or USB 2.0 backup facility
File Format Outputs	Formats:	MP3, WAV, FLAC, AAC, WMA and WMA Lossless Operator selectable
	Bit rates:	All standard supported bit rates from 64 kbps to 384 kbps for compressed.
	DRM:	Windows Media Formats only . customizable subject to Windows partner license. Watermark facility
	Reports:	HTML or PDF client output catalogue QA report Failure report
