

Ripfactory

audioview tag viewer and editing

Ripfactory's AudioView is a powerful digital music tag view and editor, allowing the user to view, sort and edit tags within the Windows Explorer environment adding powerful, fast and flexible additional functionality for music file viewing and manipulation.

AudioView supports:

- Right click tag detail viewer
- Single or bulk editing of tags
- Embedding of cover art
- Audio specific windows column detail views

Previously, such tasks required the use of a dedicated tag editor to allow such changes, requiring additional preview time at the end of an audio batch. With AudioView, it's right there in the windows environment - just right click and your done, saving critical time and allowing quality checking for tag consistency.

AudioView supports all major tag formats, including:

- Mp3 (all tag versions)
- Apple Itunes AAC(all codecs)
- WMA
- FLAC
- OGG
- APE
- Full Unicode support for maximum compatibility

System Requirements

- Windows 2000 or Windows XP Home/Pro
- Tagged Music files to standards listed
- Internet connection for automatic updates

AudioView is available to purchase as a cost effective site license at www.ripfactory.com.
